PROFILE

Motivated and detail-oriented Full Stack Developer with a strong foundation in web and mobile application development. Passionate about building efficient, scalable applications using the MERN stack and exploring AI/ML innovations. Recognized for problem-solving abilities, disciplined work ethic, and delivering timely, impactful solutions. Always eager to learn and contribute to cutting-edge projects in a fast-paced environment.

TECHNICAL SKILLS

Languages: JavaScript (advanced), C++ (intermediate)

Frameworks/Libraries: React, React Native (beginner), Node.js, Express

Databases: MongoDB, Firebase

Tools/Technologies: AWS (EC2, S3), Git, Tailwind CSS, Vite

Other: Debugging, REST APIs, Cross-platform development

PROJECTS

- DineTme – Full-stack mobile app using React Native and Firebase that allows users to book restaurant tables for specific dates and time slots.
- ToDesktop Clone – Responsive website clone of ToDesktop using Tailwind CSS, replicating UI/UX with clean and maintainable code.
- Portfolio Site – Custom personal portfolio built with React and Vite, supporting theming and fast loading.
- TicTacToe Game – A React-based game featuring move history and replay functionality.
